OIT 196-87  
9 April 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney  
Director of Information Technology

SUBJECT: Weekly Report for Week Ending 10 April 1987

25X1 \*1. The readiness review of CAMS Processing Segment (P/S)  
25X1 Release 10.0 was held on 2 April. This software release contains  
19 new and enhanced capabilities for the Intelligence Community.  
The contractor was directed by OIT to proceed with the software  
installation and data transition on Saturday, 4 April. During the  
installation, the CAMS P/S Production System was unavailable to  
customers for 11 hours.

25X1 \*3. The Director and Deputy Director of Information Technology  
met with the Acting Archivist of the United States on 6 April.  
The major topic of discussion was the information management of  
electronic records.

25X1 4. The New Building Communications Program held its biannual  
status report on 1 April in the Headquarters Auditorium for OIT  
management personnel and other interested Agency components. The  
briefing outlined what has been accomplished by the program over  
the last six months, what is planned for the next six months and  
highlights of major concerns or issues that must be resolved for  
the program to meet its schedule and goal.

25X1 \*Items of special interest

SECRET

5. After nearly 18 years of continuous use, the Message Automated Exchange (MAX) in the OIT Communications Operations Center has been retired. OIT personnel have transferred all active circuits from MAX to the Headquarters Second Phase Automated Relay Switch (SPARS). The final message was routed through the MAX system on 9 April. The MAX system was the first automated message switching system used by CIA. The other two MAX systems [redacted] have already been retired. [redacted]

6. The workstation maintenance support by OIT has continued to improve over the past several weeks. For example, on 2 April, the number of problems not addressed within 24 hours of receiving the trouble call was four. The continued decline in the number of outstanding troubles is attributed to the improved support by the contractor personnel [redacted] doing repair work and technicians assigned to the Headquarters facility handling trouble calls. [redacted]

7. OIT personnel have installed a local area network (LAN) for the Employee Activity Association (EAA). The LAN will support a new cash register and inventory system in the EAA store. [redacted]
